Corrigendum

Corrigendum to “Two dimeric lignans with an unusual α,β -unsaturated ketone motif from *Zanthoxylum podocarpum* and their inhibitory effects on nitric oxide production” [Bioorg. Med. Chem. Lett. 21 (2011) 373–376]

Pages 375: The relative configuration at C-6 of zanthpodocarpin B (**2**) should be revised as shown. The error happened due to the overlap of H-2 and H-6 in the ¹H NMR spectrum. This led to misinterpretation of a cross peak in the ROESY spectrum, which is actually ¹H–¹H COSY correlation of H-2 and H-1 instead of ROESY correlation of H-6 and H-1. This conclusion was supported by a diagnostic carbon signal of C-6 at δ 85.6.
